CONFERENCE ORGANIZATION

After 25 years of successful management of the CHNT by Stadtarchäologie Vienna, the organization of the conference is under new management. From 2021 onwards, the conference on cultural heritage and new technologies will be organized by CHNT-ICOMOS Austria a sister association of the Austrian National Committee of ICOMOS.

ICOMOS Austria

ICOMOS stands for “International Council on Monuments and Sites” and is an NGO that works worldwide for the protection, care and preservation of historic cultural heritage. ICOMOS was founded in 1965 in Krakow, Poland, following the adoption of the Venice Charter in 1964 at the Second Congress of Architects and Specialists of Historic Buildings.

ICOMOS is involved as advisor and evaluator in the work of the World Heritage Committee and in the fulfilment of the UNESCO Convention on World Heritage. ICOMOS is organised into over 120 National Committees, which can be joined as individual members. In addition, ICOMOS has 28 International Scientific Committees that deal with specific topics of research, heritage conservation and heritage management.

The national committee ICOMOS Austria currently has more than 80 individual members whose mandate is based on proven expertise in all disciplines related to heritage protection (architecture, history of art, archaeology, jurisprudence, restoration, material sciences, etc.). ICOMOS Austria is committed to the conservation of monuments, ensembles and cultural landscapes at national and international level. In order to advise experts and the public and to promote public interest in monument protection and conservation, ICOMOS Austria is active in the following areas, among others:

- Monitoring and information on monuments on the World Heritage List,
- Preparation and organisation of international colloquia and conferences on issues of monument protection and conservation,
- Publication of conference results and important policy papers on heritage conservation,
- Cooperation with other National Committees as well as with various national bodies (Association of State Monument Conservators, Austrian UNESCO Commission, BDA) and with international organisations (UNESCO, ICCROM, Council of Europe).

CONFERENCE THEME

The World's Heritage in the Digital Age

New Technologies towards sustainable research, conservation and communication

To kick things off, the 26th CHNT will be held under the motto The World's Heritage in the Digital Age – New Technologies towards Sustainable Research, Conservation and Communication.

All cultural heritage is part of the World's Heritage. The World Heritage Convention provides a clear framework for the conservation of sites on the World Heritage List. In this way many innovations are developed in particular for the research, conservation and communication of those sites. Still there are many challenging tasks that can be met with innovative technologies and new interdisciplinary methods.

The conference aims to bring together international scientists from all over the world who are involved in research, conservation and management of the world's cultural heritage. Innovative measuring, data management and processing tools are requested as well as the methods and approaches for the research, management and monitoring of sites and objects.

After a year of challenges due to the global COVID 19 pandemic, this conference aims to provide innovative ideas for the sustainable preservation of the world's cultural heritage.
